Wren – please find attached some information concerning the 2010 1-HR SO2 NAAQS non-attainment designation for a portion of Rusk and Panola Counties in Texas that includes the Luminant/Vistra Martin Lake Power Plant.

1. The final tsd (texas\_4\_deferred\_luminant\_tsd\_final\_docket.pdf) contains a discussion of all the information reviewed in making the final designation. ***This discussion begins on page 51 of the document.***
2. The Response to Comments document (rtc\_so2\_comments\_received\_document\_4\_tx\_sources\_final\_0.pdf) includes responses to specific comments from Texas and Luminant regarding the state's recommendation for the area and the modeling demonstrations provided by Sierra Club and Luminant.
3. The attached power point presentation was prepared for a briefing with Stan Meiberg on Nov. 17, 2016. It provides a high-level overview of final designations for the Texas areas.

We are also prepared to answer any questions or provide an overview on our review of the modeling demonstrations provided by Sierra Club and Luminant and the final designation for this area.

Thank you,

**Michael Feldman, PhD**
